SUMMARY

Computer Science Engineering student with strong foundations in Python programming and software development, and hands-on exposure to AI-based systems and web devolopment.. Interested in building intelligent, real-world applications while continuing to strengthen core development and problem-solving skills.

EDUCATION

Bachelor of Engineering **Sep 2023 - Present**

Akshaya College Of Engineering & Technology

- Major in Computer Science

Kendriya Vidyalaya Kanjikode **Jan 2021 - Mar 2023**

- Completed Higher Secondary education (CBSE) with 89.8%, specializing in Computer Science.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C
- **Web Development:** HTML, CSS, JavaScript
- **Databases:** SQL (Basic)
- **AI / ML & Data Analysis:** Machine Learning Fundamentals, Data Analysis & Visualization
- **Tools & Platforms:** Git, GitHub

EXPERIENCE

Praya Labs - AR/VR Intern **Jun 2025 - Jul 2025**

- Completed structured hands-on training in Augmented Reality (AR) and Virtual Reality (VR) development concepts.

Taras Systems and Solutions - AI/ML Training Program **Oct 2025 - Nov 2025**

- Completed a structured training program covering core concepts in Artificial Intelligence and Machine Learning.

ApexPlanet - Web Development Intern **Jul 2026 - Aug 2026**

- Completed a hands-on web development training program covering HTML, CSS, and JavaScript for building responsive, interactive web pages.

PROJECTS

AI-Powered Baby Monitoring System

- Developed a Python-based system using OpenCV to detect sleep/wake states and send real-time alerts via Twilio API, improving monitoring efficiency.

AI-Driven Handwritten Text Recognition System

- Built a Python-based system to recognize handwritten text using image preprocessing and machine learning techniques, enabling accurate digit/text classification from scanned inputs.

Email Summarization Agent

- Built a Python-based agent using Hugging Face transformers to run a local LLM (Phi-3-mini-4k-instruct) that extracts structured summaries, key points, action items, deadlines, and urgency from emails.
- Implemented 4-bit quantization (NF4, double quantization) for efficient inference on consumer hardware and a nested-safe JSON parser to reliably extract structured output from model responses.

CERTIFICATES

Oracle Certified Foundations Associate - Issued Apr 2025

Tata - GenAI Powered Data Analytics Job Simulation - Issued Jan 2026

Building RAG Apps Using MongoDB - Issued Oct 2025

Microsoft: Learn AI and GenAI Basics - Issued Oct 2025
